Collection Overview

One source

A one-stop shop for decorative surfaces, providing cost effective options that do not compromise on finish or performance. Quality, style and innovation are at the heart of the international EGGER Decorative Collection 2020 - 22, giving you both choice and flexibility.

Product range

Suitable for commercial and residential spaces, the collection boasts an extensive product range of Melamine Faced Chipboard (MFC), Laminate, Melamine Faced Medium Density Fibreboard (MFMDF) and Edging.

All of our products undergo extensive testing to ensure they are safe, hygienic and lightfast.

We offer 259 woodgrain, uni colour and material decors in a variety of matching products.

» See our full range of decors on pages 58-72

Availability

EGGER UK stocks all 259 decors in laminate and 100 decors in MFC. All products are available in the UK and Ireland via a network of distributors and retailers.

Worldwide availability for international projects guarantees a consistent look.

Sustainability

Our founder, Fritz Egger Senior, famously declared, "***Wood is far too valuable to just throw it away!***" This is still the guiding principle at EGGER with More from Wood our motto.

In the name of transparency we have developed a series of EcoFacts which you will find throughout the brochure, highlighting the carbon footprint and material mix of our products.

» See our environmental cycle on page 74

All decors shown and mentioned are reproductions.

What’s new?

More choices

Inspire your customers with an increased range of decor combinations and matching products. All decors are available as MFC, MFMDF or Laminate. We also offer edging solutions that perfectly match our decors and textures as well as accent edging for creative designs.

Download the EGGER Decorative Collection App now.

Download on the App Store

GET IT ON Google Play

More services

Download our new EGGER Decorative Collection App for easy access to the full range, product details and availability information. Prepare for customer presentations using MyCollection and quickly view decors with the scan function. Order samples online and visit our knowledge database for FAQs and product support.

» See our full range of services on page 73

More textures

The development of new textures makes our woodgrain and material decors even more realistic. The feel of a surface is important, which is why we have extended our range to include ST19, ST20 and ST32.

» See our range of textures & surfaces on pages 42-47

More opportunities

Keeping up with current trends is important to help you get ahead. Our increased range of decors includes industrial material reproductions such as metal and concrete, as well as soft and elegant marbles. We have also added more grey tones and created high-end accent edging which provides an eye-catching finish.

» For current trends see pages 48-57

All decors shown and mentioned are reproductions.

Products for furniture and interior design

Whether you are designing a private or commercial space, EGGER offers everything from a single source. Our wide range of decors and products helps you find the right look for less.

All decors shown and mentioned are reproductions.

All decors shown and mentioned are reproductions.

Matching Products

When it comes to your projects, you don't want to compromise on design and quality. Our tried and tested set of matching products means you don’t have to. All decors are available on Melamine Faced Chipboard (MFC), Melamine Faced Medium Density Fibreboard (MFMDF) or Laminate. We also offer edging solutions that are perfectly matched to the decor and texture.

Scan a decor code to get more information about product and decor availability in the app.

For detailed information on the mentioned product characteristics and their reference to standards, please refer to the technical data sheets available to download from egger.com.

Due to different surface textures, product characteristics and processing methods, slight variation in colour tones can occur.
All decors shown and mentioned are reproductions.

Eurodekor® Melamine Faced Chipboard (MFC)

BENEFITS

- Flexible in use
- Authentic decor and texture combinations
- Durable, lightfast and food safe
- Antibacterial properties (tested according to JIS Z 2801/ISO22196)
- Easy to process, maintain and clean
- Environmentally friendly and 100% recyclable
- Ready to use immediately – no oiling, staining or other protective measures required
- Available in decors and textures which coordinate with other EGGER products

MFC is ideal for frontals, shelves, wardrobes and wall claddings. It consists of raw chipboard coated on both sides with melamine resin-impregnated decorative paper. It can be easily cut, edged and processed.

Eurodekor® Melamine Faced Medium Density Fibreboard (MFMDF)

MFMDF is available in the same decors and textures as MFC. Thanks to its MDF core, it is well suited for applications in furniture and interior design that require high quality edging or surface milling (e.g. slat walls or furniture fronts).

» For more details visit
www.egger.com/mdfboards

BENEFITS

- High surface density for exceptional surface smoothness and profiling
- High transverse tensile strength and edge stability
- Reduced swelling behaviour
- Authentic decor and texture combinations
- Available in decors and textures which coordinate with other EGGER products
- Antibacterial properties (tested according to JIS Z 2801/ISO22196)

Laminate

BENEFITS

- Durable and easy to maintain
- Coating for core materials
- Easy to process
- Available in decors and textures which coordinate with other EGGER products
- Antibacterial properties (tested according to JIS Z 2801/ISO22196)

Laminate is both versatile and hard wearing. An attractive product for designers, laminate is ideal for mid to high traffic surfaces as well as curved elements. As a decorative coating material, it can be bonded on chipboard and MDF, as well as multiplex, plywood and other core materials.

Laminate with coloured core

BENEFITS

- Perfect joint lines, especially in the case of mitred panels
- Can be coordinated with EGGER Compact Laminate due to the same decors and textures being available for both products
- Antibacterial properties (tested according to JIS Z 2801/ISO22196)

Laminate with coloured core has a multilayer structure of melamine impregnated papers in the same colour as the decorative layer. By using a laminate with coloured core, join lines and visible edges are minimised and an upmarket look can be achieved.

» For more details visit
www.egger.com/coloured-core-laminates

Product structure

All decors shown and mentioned are reproductions.

Compact Laminate

BENEFITS

- High durability
- Moisture resistant
- Hygienic and easy to maintain
- Resistant to everyday cleaning products and chemicals
- Available in decors and textures which coordinate with other EGGER products
- Antibacterial properties (tested according to JIS Z 2801/ISO22196)

Compact Laminate is extremely durable, and moisture resistant, making it the ideal material for indoor applications where high impact and an increased demand for hygiene and cleanliness is key. Suitable for kitchens, bathrooms, washrooms and hospitals.

- Melamine resin-impregnated decorative paper
- Overlay (for wood and material reproductions)

Door Size Laminate

BENEFITS

- Door formats with minimal cutting waste
- Available from stock in single sheet quantities
- Coordinated interior doors with furniture
- Durable, lasting, and easy to clean
- Antibacterial properties (tested according to JIS Z 2801/ISO22196)

Door Size Laminate is a cost effective alternative for interior doors. Available from UK stock in standard sheet size 2150 x 950 mm, Door Size Laminate can be used in many applications such as bedrooms, playrooms, schools, hospitals and offices.

Available in the same decors and textures as other products such as MFC and edging, they can be combined together for a coordinated look. The door laminate collection consists of 81 decors in woodgrain, material and uni colours.

Feelwood

BENEFITS

- Fade and scratch resistant
- Easy to clean and maintain
- Authentic look and feel
- Matching products
- Cost effective alternative to real wood or veneer
- Antibacterial properties (tested according to JIS Z 2801/ISO22196)

The EGGER Feelwod range is available in 29 decors accross six textures.

Feelwood can be used alongside EGGER's matching products to create a high-end finish. This includes MFC, MFMDF, Laminate, Worktops and Edging.

PerfectSense® Premium Gloss lacquered boards

PerfectSense Premium Gloss (PG) dazzles with its high sheen and represents pure luxury. Rooms appear lighter and larger thanks to its high degree of gloss and its reflective nature. PerfectSense Premium Gloss (PG) Laminate is available to match all PerfectSense Premium Gloss (PG) lacquered boards.

» For more details visit
www.egger.com/perfectsense-gloss

BENEFITS

- Create exclusive and modern furniture design
- Stands out due to its unblemished surface and reflective nature
- Improved surface properties in terms of microscratch and scratch resistance
- Antibacterial properties (tested according to JIS Z 2801/ISO22196)

PerfectSense® Premium Matt lacquered boards

PerfectSense Premium Matt (PM) is on trend with its matt, velvety surface. PerfectSense Premium Matt has anti-fingerprint properties thanks to its high quality lacquered finish. PerfectSense Premium Topmatt Laminate (PT) is available to match all PerfectSense Matt lacquered boards.

» For more details visit
www.egger.com/perfectsense-matt

BENEFITS

- Anti-fingerprint properties
- Easy to clean
- Elegant finish
- Create modern and on trend design
- Resistant to micro-scratches, and can withstand even coarser scratches
- Suitable for horizontal applications
- Antibacterial properties (tested according to JIS Z 2801/ISO22196)

All decors shown and mentioned are reproductions.

PerfectSense® Topmatt Laminate

BENEFITS

- Suitable for horizontal and vertical use
- Super-matt, velvety, warm surface with anti-fingerprint properties
- PerfectSense Topmatt Laminate (PT) is available in the same decors as PerfectSense Premium Matt lacquered boards
- Antibacterial properties (tested according to JIS Z 2801/ISO22196)

PerfectSense Topmatt Laminate (PT) is ideal for high traffic horizontal surfaces. It is well suited to areas where a combination of matt design and durability is required.

PerfectSense Topmatt Laminate with Coloured Core is available to minimise joint lines and edges.

Matching ABS Edging

BENEFITS

- Colour and texture coordinate with the decors
- Board and edging from a single source
- Edging available from stock starting from one roll
- Digitally printed decors

ABS Edging is used to finish the exposed edges of decorative wood-based materials. Matching ABS edging is available for all MFC and laminate decorative surfaces. Available in a wide range of widths and thicknesses, ABS edging matches EGGER's decors, textures, and gloss and matt levels.

Scan the decor code using the app.

ABS Accent Edging

An innovative accent edging range showcasing how a high-value look can be achieved with minimal effort.

Three-layer:
Create the look of a three-layer solid wood or ply sheet. It can also be used to create a natural accent in combination with uni colours.

Multiplex:
Offers the possibility to combine the look of a thin-coated multiplex board with our entire range of uni colours, which is popular in interior design.

Special:
Creates strong accents in combination with white uni colours and adds a modern 'material' contrast. Natural woodgrains, brown wood and grey uni colours also work well with this edging.

PMMA Edging

PMMA edging is a thermoplastic edging product that adds an attractive design element to decorative surfaces.

PMMA edging PG/PM
For all PerfectSense Premium Gloss and Matt decors PMMA Doppia edging is available in a 23 × 1.3 mm format. Doppia edging adds depth to the PerfectSense decors and is ideal for a high-end look.

PMMA accent edging
Current trends in furniture design focus on combining a variety of materials. Uni colours have also become a dominant factor when selecting decors. They truly come into their own when partnered with PMMA accent edging, creating a striking finish in a number of combinations. PMMA has been in the market for many years, is reliable and easy to process.

Flammex

Flammex products

Public and hospitality sector projects have to meet fire and safety regulations.

Flammex products are functional without limiting design flexibility. A newly developed production process classifies our fire-retardant products to the European standard EN 13501-1 and meets the strict requirements for Euroclass B-s2, d0. Flammex MFC, Flammex MFMDF and Flammex Laminate are available in more than 200 different decors.

» For more details visit
www.egger.com/flammex

BENEFITS

- Provides passive fire protection
- Slows the spread of fire giving time to evacuate
- Reduces smoke and drop formation in case of fire
- Regular checks by external testing institutes
- Antibacterial properties (tested according to JIS Z 2801/ISO22196)

Use the app to find decors for Flammex products.

Worktops

Worktops Collection

An exciting and versatile range of worktops. The high quality of this durable product makes it ideal for kitchens, bathrooms, offices and commercial interiors such as shop counters. Our new collection includes a 38 mm postformed range of woodgrains, concrete and marble reproductions. The on-trend square edged range features Feelwood oaks in 38 mm, marbles and slates in 25 mm and elegant new materials in 16 mm. With the decor on both sides, the 16mm worktops are ideal for waterfall island designs.

» For more details visit
www.egger.com/worktops

BENEFITS

- Hard-wearing and scratch-resistant
- Lightfast and food safe
- Antibacterial properties (tested according to JIS Z 2801/ISO22196)
- Easy to clean
- Stain and heat resistant
- Multi-purpose applications

Matching Products

Matching upstands, splashbacks and ABS edging are available in all worktop decors to create a coordinated finish. In addition, end-grain edging is available for the four 38 mm square edged worktops.

Matching splashbacks and upstands are a stylish alternative to tiling as they require no grouting and are simple to look after and maintain. Available in an 8 mm and 10 mm thickness with a square edge profile.

All 16 mm square edged decors are available as 38 mm postformed worktops to create a matching, on trend thick and thin finish. The 16 mm worktops can also be used to create shelving or side panels.

Decor F628 ST16 Silver Grey Metal Slate is pictured below as a 16 mm worktop, also used as shelving, with matching MFC drawer frontals and splashback.

Scan the decor code using the app.

All decors shown and mentioned are reproductions.

Worktops Accessories and Fitting Tools

A new range of accessories and fitting tools have been developed for easy access to essential items required when installing a worktop.

Two installation kits, EGGERSeal waterproof sealant and adhesive, and additional accessories, are available to purchase with the worktop. An EGGERSeal colour match is available for each decor.

If these accessories and fitting tools are used in conjunction with the EGGER fitting guide, the worktop is guaranteed for 10 years.

ACCESSORIES AND FITTING TOOLS

- 16 mm installation kit
- 25 mm and 38 mm installation kit
- EGGERSeal cartridge
- Metal traverse
- Wooden batons
- Jig

EGGER Worktops 10 Year Guarantee

EGGER worktops have a 10 year guarantee when fitted using EGGERSeal adhesive in conjunction with the fitting guide (provided in the installation kit).

The 16 mm, 25 mm and 38 mm installation kits provide everything you need to successfully install an EGGER worktop.

2. Use the scanning function to capture any decor or texture code.
3. Access:
   - Your chosen decor in full board and 3D
   - Quick sample ordering
   - Availability information

All decors shown and mentioned are reproductions.

Woodgrain textures

The right texture is vital if you want to make a woodgrain reproduction stand out. Our woodgrain textures are created with matt-gloss effects, gently brushed pores, soft hollows, and authentic cracks, to give an impressive natural appearance.

A highly authentic and realistic texture for woodgrain reproductions.

An irregular distribution of linear pores, of various depths, gives the surface a natural look. A light sub-structure gives a velvet feel to the surface.

A linear finish with a matt-gloss effect creates authenticity. The texture aligns with lightly-planked woodgrain decors. It can also be used with solid colours for a painted wood look.

A deep brushed finish with a matt-gloss linear grain, provides a realistic surface for linear woodgrains.

Scan the decor texture code using the app.

Feelwood

Synchronised pore technology brings Feelwood to life by matching woodgrain features with the texture. This reproduces a solid wood effect that is realistic to the touch. Feelwood is a cost effective alternative to real wood or veneer.

Characterised by its authentic feel, cracks and knots create the natural look and feel of real wood.

Create a natural vintage look and feel. The worn appearance of the woodgrain is enhanced by the synchronised surface.

An interplay of matt and light-gloss gives a pearlescent sheen. The matt and softly brushed pore provides the surface with depth, giving it a natural look.

A deeply brushed but very natural, matt character that gives many different types of wood reproductions an authentic feel.

An authentic solid wood finish, enhanced by the synchronised pore finish, gives the Halifax Oak decor range a realistic look and feel.

Displays a deeply brushed softwood appearance with matt-gloss elements. It looks like painted or lacquered solid wood when applied to uni colours.

All decors shown and mentioned are reproductions.

Matt and gloss surfaces

Use matt and gloss surfaces for a high-end look.

PerfectSense Premium Gloss is characterised by its exceptionally smooth and reflective finish.

PerfectSense Premium Matt has a warm and silky feel combined with high resistance and anti-fingerprint properties to provide a high quality, matt finish.

A smooth, untextured surface, used with white to create a paint-like finish.

A pearl texture, with a medium gloss level. This surface is robust, durable and is best used with uni and pearlescent colours.

Used with uni colours and woodgrains offering a very soft and natural feel. This texture supports the trend for matt surfaces.

A smooth, flat, and easy-care surface with reduced gloss. It highlights the quality of elegant wood and material reproductions.

Material and metal textures

Reproductions of stone and metal are becoming increasingly important. These decors are given the desired authenticity and character through the appropriate texture.

A rough plaster look, containing both deep and glossy elements. On reproductions of concrete, metal and stone it creates an authentic finish.

Metallics are popular in on-trend furniture design. ST20 Metal Brushed gives pearlescent and metallic decors the look and feel of finely sanded metal.

A matt-gloss effect, simulating the surface and feel of a ceramic sheet.

Trend Worlds

Today's interior design trends frequently come without clear guidelines.

For many years, people have been focussing on Mix + Match. This has eventually led to more design themes. We have used these new trend worlds as a basis for the development of our new decors.

On the following pages, we will show you how varied today's design trends are.

Discover all trend worlds at
www.egger.com/trend-worlds

The wide spectrum of black

Under the motto ‘Black is Back’, black has found its way back into design via accessories such as handles and metal frames. Black now appears in ultra modern furniture design and has become an elegant contrast. Gloss and matt surfaces allow the darkest uni colour to look different.

The new EGGER Decorative Collection offers various options for basic black tones, such as Soft Black and Shadow Black. In addition, woodgrains combined with black provide a wide range of elegant and natural possibilities for this trend.

Urban design charm

Urbanisation as a megatrend influences design. Small living spaces in cities should not only be practical but also designed in a minimalist way. The influence of Scandinavian design, with its light materials, has become significant.

Cool combination materials, such as concrete and metal, and light, neutral grey tones, form the link with urban charm creating the trend world Light Urban.

PERFECT *imperfection*

Perfection meets emotion

Perfection can be easily achieved with the help of the latest technology, but this is not always desirable in design. Irregularities and imperfections, such as cracks, splinters, handmade elements, or weathering, are also used to achieve a finish full of emotion but with a natural appearance.

The role of texture is becoming important in the age of digital products. The heavy used look or industrial style in combination with very calm and straight-lined designs creates the trend world Perfect Imperfection.

FUTURE *retro*

The combination of past and future

The future is more tangible than ever. Technical and digital developments have made amazing progress.

The yearning for old and trusted values, timeless classics, and particularly the warmth of the 50s and 60s is on the rise. The expectations of this trend are met by integrating classic materials, such as marble, textile or walnut, into the new EGGER Decorative Collection.

Modern reproductions and natural textures, just like the new, authentic surface ST19, can be found in the trend world Future Retro. The classics are being rediscovered in new combinations, such as black or metal.

Our services

We offer a wide range of services and tools to help you and your customers get the most out of our comprehensive collection.

EGGER Decorative App

Our app provides the entire Decorative Collection at your fingertips, whenever and wherever you need it. Find availability information, full board scans, sample ordering and decor combinations all in one place.

Download the EGGER Decorative Collection App now.

Download on the App Store

GET IT ON Google Play

Support through visualisation

To bring your decor combination ideas to life we have a Virtual Design Studio (VDS). Access a wide range of room sets where you can apply different decors to see which suits your project. This can save you significant product development time and cost.

» Find out more on
www.egger.com/vds

Trend support

Our monthly EGGER Insights campaign incorporates design trends to focus on a specific aspect of the collection.

» Find out more on
www.egger.com/insights

Our website and myEGGER

From technical datasheets, processing instructions, certificates and product availability, to case studies, trend information and services, egger.com has everything you need. If you use CAD, your package may already include EGGER decors. However if it doesn't, we can supply decor scans for our full collection.

» Register at myegger.com and benefit now.

Support through samples

Try before you buy when you need something more tangible than a brochure. You can order samples online or order them quickly and easily via the new collection app.

» To order your samples
www.egger.com/shop

All decors shown and mentioned are reproductions.

Our environmental cycle

Wood-based materials production
To continually improve our environmental performance in the production process, we adhere to internationally certified energy and environmental management systems in accordance with ISO 50001, ISO 14001 and EMAS.

Consumer
We provide full transparency through Environmental Product Declarations (EPDs). They give end consumers important information about environmental and health aspects for each of our basic products.

Recycling
Recycled wood, consisting of waste wood from disposed goods and those not fit for sale, is prepared and used for chipboard production.

Sawmill
Every year over half a million tonnes of sawmill co-products are used in the production of our wood based panels, derived from logs sourced from sustainably managed forests.

Sustainable forestry
We act responsibly with regard to forests and the environment and are certified according to ISO38200 PEFC™ and FSC® (Forest Stewardship Council®), depending on the availability of the wood. In line with the EU Timber Regulation (EUTR) we only buy timber from verified suppliers.

FSC www.fsc.org FSC® C017963 The mark of responsible forestry

PEFC PEFC/06-38-171 Promoting Sustainable Forest Management www.pefc.org

Renewable energy
We turn biogenic fuels, which can no longer be used, into heat and green electricity in our own biomass power plants.

Wood-based materials with environmental values.

EGGER policies and processes meet high environmental standards. Carefully calculated statistics highlight a product's carbon footprint, how much recycled material is used in the production phase and/or how much of the material is sourced from renewable raw materials.
See example below.

Product structure
Eurodekor Melamine Faced Chipboard

1 **–13.8 kg** CO_2 / m²

2 **87 %** material from renewable resources
13 % material from fossil resources

3 **23 %** recycled material
42 % by-products from the sawmill industry and pre-consumer recycling wood
35 % fresh resources

4 **68 %** regional wood origin

5 **100 %** verified legal wood origin
61 % of that certified

www.egger.com/ecofacts

1 **Carbon footprint***
Wood-based materials are climate-friendly. They store more carbon dioxide than they emit during production.

2 **Contribution to the bioeconomy****
Wood-based materials grow back.
Unlike fossil raw materials, wood is a renewable resource.

3 **Contribution to the circular economy****
We conserve natural resources.
We act in cycles and make the best possible use of existing wood.

4 **Wood proportion from the regional environment**
We focus on short distance transportation.
Our roundwood is mainly procured regionally.

5 **Wood proportion from verified and certified sources**
We use wood from verified and certified sources.
We are committed to sustainable forest management

Full transparency from us and no paperwork for you
To save you time and effort, when you need to submit certification documents for your projects, we have stored all environmental information in one place for easy access.

THIRD-PARTY VERIFIED EPD ISO 14025 and EN 15804 Institut Bauen und Umwelt e.V. EHD

» Find out more at
www.egger.com/environment

* externally verified calculation according to EN 15804, see EPD
** own calculation according to the rules of ISO 14021 for environmental supplier declarations, proportion by dry weight. The values are related to the average product structure and may deviate slightly depending on the thickness and selected coating.

A responsible choice

Responsible product choices can be made with the EGGER Decorative Collection. Environmental Product Datasheets (EPD), Environmental Health Datasheets (EHD), Technical Datasheets (TD) and certificates are available to download via egger.com to help improve product transparency.

Our latest sustainability report can be viewed and downloaded at egger.com/sustainability-report

Product accreditations overview

All wood-based products can be delivered certified with the appropriate ISO 38200:2018 statement. Depending on the availability of wood and product we can offer FSC® and PEFC certification at the customer's request. To download FSC, PEFC and ISO 38200 certificates and for further information about wood origin and sustainability please visit www.egger.com/sustainability

EHD's and certificates contain information about each accreditation and proof of compliance.
To download the relevant documents visit egger.com/specifiers-handbook

* Please ask your sales contact for an alternative product to meet this criteria.

Timberpak Limited: Your waste wood solution

EGGER's recycling subsidiary **Timberpak Ltd** can support you with project refurbishment by offering a sustainable solution for waste wood. For over 20 years, Timberpak has sourced the recycled material required to produce EGGER's carbon negative melamine faced chipboard in the UK.

Timberpak makes a valuable contribution to improving the environment as the waste wood it sources stores carbon in the lifetime of new products, and creates a market for items that would otherwise be burnt or sent to landfill.

If Timberpak receives any items that cannot be recycle for chipboard production, it will still collect, grade and direct it to the most appropriate waste stream.

Timberpak has four UK sites located in Yorkshire, the North East, Scotland and the South East. Deliveries can be made direct to site, or collection can be arranged.

To find out more information visit egger.com/Timberpak

All decors shown and mentioned are reproductions.

The EGGER Group

The EGGER Group is one of the world's leading wood-based material manufacturers.
Founded in 1961, it has 20 plants and operates 24 sales offices worldwide.
EGGER products are found in many areas of private and public life, including kitchens, bathrooms, bedrooms, offices, hotels, and shops.

More than just furniture and interior design

'Creating more from wood' is more than just a slogan for us.
In addition to products for the furniture industry, we also supply interior flooring products and building products.

Our flooring is quick to install, environmentally friendly and easy to care for. Take a look at our three types of flooring (laminate, comfort and design floors), each with specific properties to cover an entire range of customer needs.
www.egger.com/flooring

Whatever your project is, EGGER Building products can aid in making it straightforward and efficient. We have a wide range of reliable and environmentally friendly OSB straight edge and HDX boards, structural flooring solutions, DHF underlay, timber and adhesives.
