 dp-lamination

## Surfaces for any space

The dp-specialist range is a comprehensive set of gloss and matt surface finishes from market leading brands including Senoplast and Alfatherm. All the surfaces can be laminated straight from the roll onto your substrate of choice, perfect for trade and volume customers. Collections within the range include Senoplast high gloss and matt acrylics, Serica super matt's, PP's, PVC's & PET's and finally our Stipple Collection. Constant product development, working on design and surface performance has ensured that the most fashionable and hard-wearing products are included throughout the offer.

# Substrates

Chipboard and MDF substrates are available in thicknesses ranging from 2mm up to 45mm, widths of 1220mm, 1830mm, and 2050mm and over 100 different board lengths.

Specifically developed for the leisure industries, Decorative Panels Lamination's plywood offer is very extensive. Combining strength and lightweight benefits with a comprehensive and diverse range specification, plywood remains the material of choice for many such applications.

Unique to the UK, Decorative Panels Lamination offers the sheet production of a groundbreaking hollowcore product that is branded

dp-lite. Manufactured with 5mm MDF skins that make the use of standard furniture fittings easy, and in thicknesses ranging from 22mm to 100mm, this product offers weight savings compared to chipboard of over 60%.

Facing with plywood instead of MDF has brought new market potential for dp-lite, particularly in the leisure industry where weight is so important.

Plasterboard for use in the temporary and portable accommodation sector is a substrate that Decorative Panels Lamination are able to offer laminated in a wide variety of surface decors.

## Chipboard

Manufactured to E1 P2 standard  
Over 100 board sizes available

Thickness range: 8mm to 30mm  
Width options: 1050mm / 1220mm / 1830mm / 2050mm  
Length range: 1830mm to 4900mm

## Medium Density Fibreboard (MDF)

Manufactured to E1 standard  
Over 45 board sizes available

Thickness range: 8mm to 45mm  
Width options: 1220mm / 1830mm / 2050mm  
Length range: 1830mm to 3660mm  
Grades available: Standard / Deep Router / High Density / Moisture Resistant

## Thinboard

Manufactured to E1 standard  
Thickness range: 2mm to 6mm  
Width options: 1220mm  
Length range: 1830mm to 3050mm

## Plasterboard

Gypsum based constructional panels  
Thickness range: 9mm to 15mm  
Width option: 1200mm  
Length range: 1850mm to 2750mm

## Plywood

Thickness range: 2.7mm to 25mm  
Width option: 1220mm  
Length range: 2135mm to 2440mm  
Grades available: UltraLite Ilomba faced Poplar 5 Ply / UltraLite Poplar faced 5 Ply / SuperLite Far Eastern 5 Ply / Thin Overlay Plywood

## dp-lite hollowcore MDF skin

Thickness range: 22mm to 100mm  
Width options: 1020mm / 1220mm  
Length range: 2010mm to 2440mm  
Skin thickness: 5mm

## dp-lite hollowcore Plywood skin

Thickness range: 12mm to 22mm  
Width option: 1220mm  
Length option: 2440mm  
Skin thickness: 3mm

# senoplast acrylic high gloss

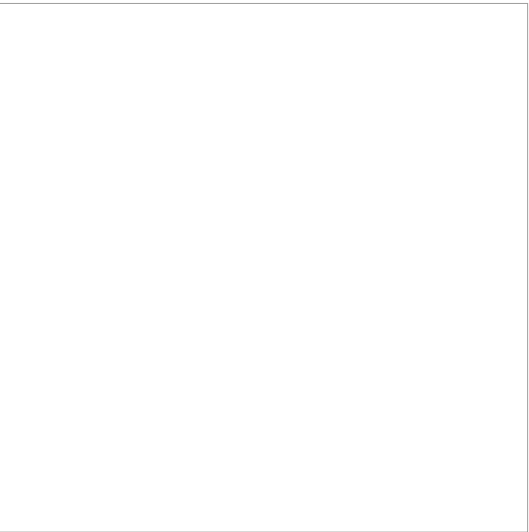

ranging from 0.7mm - 1.0mm  
in surface thickness

Senoplast acrylic high gloss is recognised as the premium product within the sector combining the look of a solid surface acrylic without the prohibitive cost. Available in surface thickness of 0.7mm - 1.0mm all supplied laminated with a protective film.

# senoplast acrylic TopX gloss

ranging from 0.7mm - 1.0mm  
in surface thickness

Senoplast acrylic TopX is an amazing scratch resistant material that offers extreme resilience whilst maintaining a full high gloss finish.

With very high scour and scratch resistance the product is ideally suited for use on horizontal surfaces that are subjected to heavy use. Currently available in black, white and cream with more exciting colours coming soon. All product is supplied laminated with a protective film.

# fineflex

With the merge of two premium surfacing brands; Fine Decor and Schattdecor, years of design expertise in the field of solid colours and decor printing have come together, along with pioneering technology to produce sustainable lacquer laminate surfaces. The two companies are united in their first joint product – Fineflex. A quality surface made with a percentage of recycled PET.

Through a patented lacquering process, a surface with a unique feel and anti-fingerprint technology has been achieved. Fineflex is particularly easy to clean and conforms to 6250 and 6222 standards. Thanks to its moisture resistance, the surface is not only ideal for furniture surfaces, but is also particularly suitable for use in humid areas such as kitchens and bathrooms. With outstanding processing properties and containing a percentage of recycled PET, Fineflex is an environmentally conscious alternative for 2D lamination, as a thermoforming film for three-dimensional surfaces and wrapping or postforming.
