

Decorative Panels Lamination offer a range of Alpikord Veneers which combine the beauty of real wood with the practicality and versatility of prefinished solution - an eco-sustainable alternative to natural wood veneers. A ready to use wooden panel offering state of the art in terms of surface treatment and varnishing.

Uses and Applications

- Furniture applications including fascia panels – horizontal surfaces in particular due to a melamine finish
- Furniture doors
- Wall panels
- Internal fit out
- Exhibition applications
- Shopfitting, restaurant & retail fit outs
- Public buildings furniture & fit out
- Residential & commercial furniture
- Hotel and hospitality applications
- Work surfaces on counters & table tops

Benefits of Using the Product

- No further surface finishing required - the veneer has been pre-treated and varnished
- Looks and feels like real wood with the added versatility and practical benefits of HPL
- Eco-sustainable alternative to natural wood veneers
- Benefits of real wood with technological advantages of industrial production
- Maintains the warmth and variety of natural wood
- Unique surface finish as no two sheets are the same, they will have subtle differences

Colours and Finishes Available

Alpikord is available in two different finishes which enhance tactile and visual sensations – Groove and Wax. There are many colour and finish options available; consult the Decorative Panels Lamination 'Wood Veneer Laminate' brochure for more information on www.decorativepanels.co.uk or RIBA Product Selector. Finish options are dependent on colour choice. Matching edgebanding from mainstream edging suppliers available.

Technical Information

Available as standard in the following substrates and sizes:

MDF
3050 x 1300 x 15mm
3050 x 1300 x 18mm

The mark of responsible forestry

Laminated with balancer.
