

dp-
furniture

Decorative Panels Furniture not only manufacture flat pack furniture, but also help design, develop and prototype the furniture ensuring the products that get to market are going to be the most stylish and saleable.

group vertical integration equals cost effective furniture

precision manufacturing

making **flat pack** easy

Capabilities

As part of the dp-group of companies, Decorative Panels Furniture is able to reap the benefits of vertical integration, whether it be with board manufactured and supplied by Decorative Panels Lamination or the use of group design and development functions - vertical integration that means the most cost effective furniture is accessible to the retailer every time.

Decorative Panels Furniture operates from a manufacturing site of some 270,000ft² located centrally in the North of England. Specialists in the production of flat pack furniture, the company has a productive capacity of over 15,000 boxes per day, making Decorative Panels Furniture the largest flat pack producer in the UK and one of the largest in Europe.

Whatever your flat pack needs are, Decorative Panels Furniture make it easy for you to fulfil your requirements.

After purchasing the furniture business in 2009, the Decorative Panels Group quality principles were adopted into the new business. Current certification to the latest ISO 9001:2008 standard demonstrates to customers the ability of Decorative Panels Furniture to provide products and services meeting their most stringent quality criteria. Total Quality Management (TQM) throughout the business brings an integrated philosophy of continual improvement that embraces the entire supply chain in order to meet and enhance complete customer satisfaction.

Products

With the massive choice of board materials that are available within the dp-group, it is easy to see how Decorative Panels Furniture is able to offer such a comprehensive range of design and style within their flat pack portfolio of products. Using chipboard and MDF in classic and contemporary woodgrain, unicolour and fantasy designs coupled with high gloss, super matt and tactile surface finishes, the eclectic mix of designs are endless.

Incorporating the company's own brand dp-lite hollow core board enables the "chunky" look to be achieved with ease and style, giving the retailer that extra USP that is so essential in the market.

Bedroom, living, home office, kitchen or occasional furniture, an unrivalled product choice from the leaders in flat pack production.

chunky furniture easy to assemble

flat pack without style compromise

packaged and delivered to meet customer needs

ideally located to service the world

Markets

Any market that requires flat pack furniture will benefit from an association with Decorative Panels Furniture, whether for bedroom, living, home office, kitchen or occasional furniture.

Environment

Environmental initiatives to help protect the world's resources have always been important at Decorative Panels Furniture.

The methods employed in the production process ensure that any materials that would have traditionally been seen as waste are processed back into the supply chain for recycling and reusing in the appropriate manner.

Energy efficient lux and movement controlled lighting and dust extraction with intelligent damper controls are prime examples of the company's desire to preserve energy resource wherever possible.

These are some of the environmental initiatives that form an integral part of the group's production systems:

- FSC® Chain of Custody Certified no: RA-COC-000350
- PEFC™ Chain of Custody Certified no: NC-PEFC/COC-000059
- Wood waste is burnt to heat factories
- Additional wood waste is recycled back into particleboard products
- Sawdust is reused as a filtering medium and as biomass fuel
- Metal banding is cut and passed on for recycling
- Waste foil materials are baled and recycled
- Energy is conserved through lux and movement controlled lighting
- Extraction systems have intelligent dampers and inverter control

PEFC™ and FSC® chain of custody certified

movement controlled lighting and efficient dust extraction throughout the business

environmental initiatives are key to the group
